

## BENEFITS FOR AMPS MEMBERS

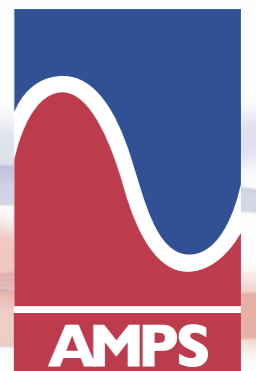

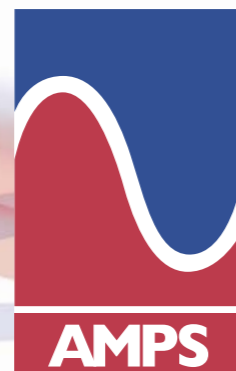

- Directory of members on the AMPS website together with a circulated magazine
- Monthly e-bulletin and quarterly magazine
- Regular features in other publications such as EGSA's 'powerline', WIP, UK Power and Energy Digital
- Sponsorship of AMPS Power Expo and IP&EE – reduced rates for AMPS members
- Active website and marketing department dedicated to promoting members' products and services
- Affiliations to EUROGEN (European Generating set Association), BEAMA (British Electromechanical & Allied Manufacturers' Association), IDGTE (Institution of Diesel and Gas Turbine Engineers), EGSA (Electrical Generating Systems Association) and ESSA (Electricity Supply Association of Australia Ltd.)
- Membership of 35 relevant BSI, ISO, CEN, CENELEC and IEC committees
- Regular technical meetings, workshops, training support and industry relevant seminars with high profile speakers
- Annual Conference and Luncheon at a prestigious venue
- Export opportunities for UK manufacturers
- Networking events such as golf day and kart racing
- Legal 'first call' assistance
- Access to private healthcare insurance scheme
- Technical expertise
- Benchmarking standards and terms

## BENEFITS OF DEALING WITH AMPS MEMBERS

- Quality products and services
- Cost effective solutions
- Commercial and technical expertise
- Compliance with International standards
- International distribution (over 150 countries worldwide)
- Worldwide product support
- Members conform to agreed terms & conditions of business & warranty
- AMPS members are amongst the most successful exporters of diesel & gas driven electrical generating systems in the world

**For more information about AMPS membership, technical help and sourcing suitable suppliers contact AMPS on +44 (0) 8456 448748**

## THE LEADING NETWORK OF POWER GENERATING MANUFACTURERS & SUPPLIERS IN THE WORLD

**AMPS** (THE ASSOCIATION OF MANUFACTURERS OF POWER GENERATING SYSTEMS) ARE THE UK BASED TRADE ASSOCIATION, WHICH PROVIDES A VOICE FOR MEMBER COMPANIES OPERATING IN THE ELECTRICAL POWER GENERATING SYSTEMS INDUSTRY.

AMPS are active in representing members' interests through close relationships with US based EGSA (Electrical Generating Systems Association) and the DTI (Department of Trade & Industry). This ensures that the views of the generating set manufacturers, users and specifiers are fully represented in the European Community and that

international standards are established to the benefit of the whole industry.

**TECHNICAL CONSULTANCY**

AMPS ensure the highest standards are maintained by the publication of regular guidelines on technical subjects and good industry practice and by monitoring new research and development activities. Through its technical committee, members are actively encouraged to keep abreast of the latest industry developments.

With extensive experience in all aspects of the industry, the Association is in a unique position to give advice and guidance to prospective users of mobile or static power, from recommending suitable manufacturers to liaising with

any government or public authority whose policies might affect the specification or material standards of the members' products.

Whether it is power for pumping water in Africa, the Stock Exchange in London or hospitals in the Far East, the comprehensive experience of AMPS and its members is unequalled.

**Technical support**

AMPS encourage all its members to actively participate in the work of its technical committee. Members' interests are represented on a number of International, European and national standards committees as well as the EUROPGEN technical committee, helping to lead the way forward in research and continuing to raise standards of quality and efficiency.

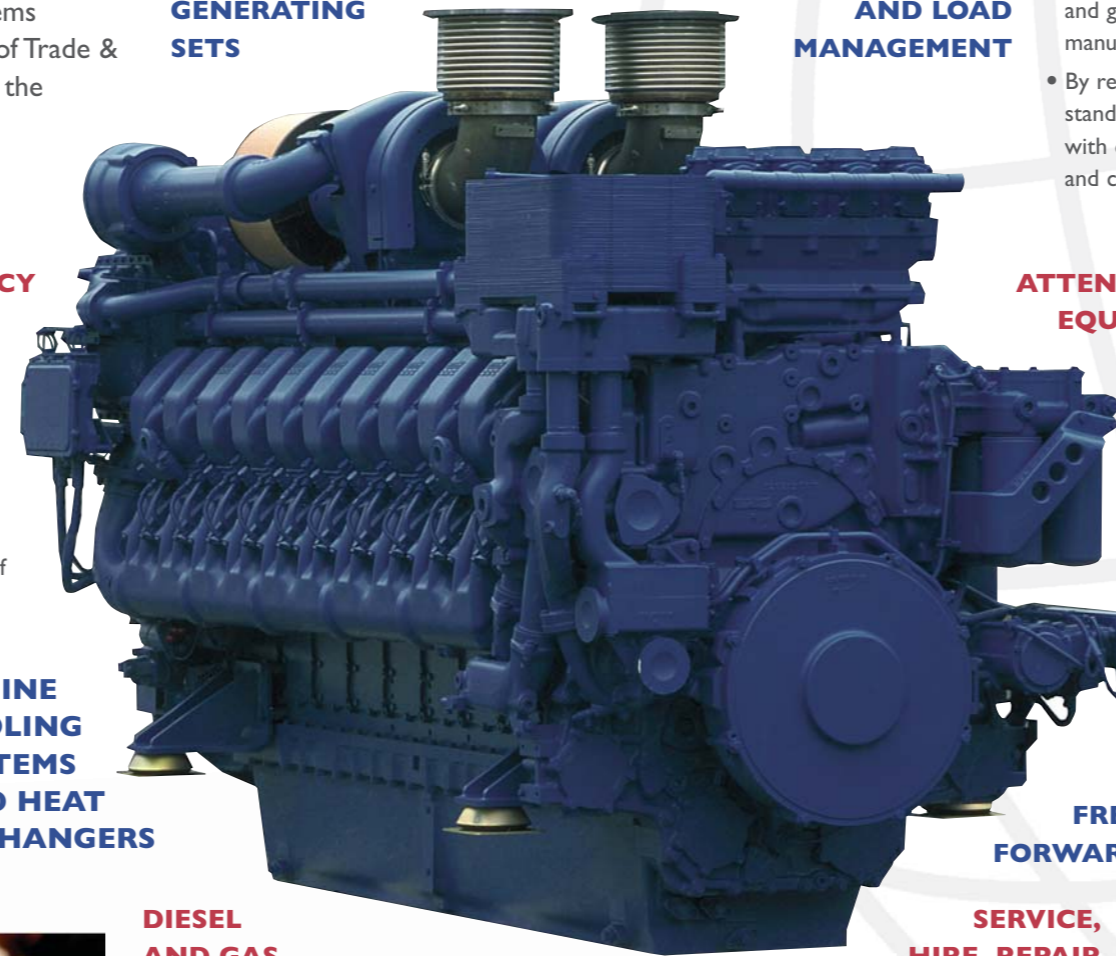

**DIESEL AND GAS ENGINE MANUFACTURERS**

**ELECTRICAL CONTROL & MONITORING AND SWITCHGEAR PANELS**

**DIESEL, GAS AND GAS TURBINE GENERATING SETS**

**ELECTRIC, AIR AND HYDRAULIC ENGINE STARTING**

**ENGINE GOVERNING AND LOAD MANAGEMENT**

**NOISE ATTENUATION EQUIPMENT**

**FREIGHT FORWARDING**

**SERVICE, HIRE, REPAIR AND INSTALLATION**

**Association aims**

- To promote the global sales and services of diesel & gas engine and gas turbine driven electrical generating systems manufactured by the member companies of AMPS
- By representation on National, European and International standards committees, EUROPGEN and other bodies, to speak with one voice on all issues of technical standards, legislation and commercial policy, which affect the members interests
- To help members maintain the highest technical standards, quality and customer support

**Membership profile**

AMPS members are leading designers, manufacturers, suppliers and installers of reciprocating diesel and gas engine electrical generating systems of a single unit output up to 5MW. The equipment has a broad spectrum of applications which include industrial, commercial, military, marine and off-shore installations for standby and base load electrical power, landfill gas projects, co-generation / combined heat and power systems, complete power stations and major turnkey power generation projects.

- Design, manufacture, supply or assemble and market Electrical Generating Systems
- Design, manufacture and market engines, motors, generators, switchgear and related components other than for their own use
- Are principally engaged as a distributor or dealer of Electrical Generating Systems.
- Rent or hire Electrical Generating Systems
- Will normally have been trading for at least 12 months
